Position for a Doctoral Student

A position for a doctoral student is available at Movement Neuroscience and Rehabilitation Laboratory at Department of Health and Exercise Science at Colorado State University.

The research focus of the MNR laboratory is to understand the mechanisms underlying impaired movement control and its influence on everyday function including bimanual hand use and driving in stroke and older adults. For recent publications Lodha et. al., Frontier in Neurology, 2017, Lodha et. al., Converging Clinical and Engineering Research on Neurorehabilitation II, 2016.

Qualifications
Qualified candidates must have a bachelors or a masters degree in kinesiology, engineering, neuroscience or any biomedical field. The ideal candidate will have expertise in at least one of these areas: scientific writing and communication or computer programming. High level of motivation and ability to self-learn in a new environment is expected.

Full applications, including cover letter with a description of past research experience, a curriculum vitae, the names of three references, and expected availability date should be submitted via email to:
